LEARNING 'N' MOTION

PRESCHOOL WITH A TWIST!

Not just your regular pre-school! Learning 'n' Motion is a program that integrates gymnastics concepts and movement into pre-school program activities. With the use of a non-traditional classroom, we are able to incorporate body awareness/control, movement & strength, eye-hand coordination, large/fine motor skills along with brain development, math, writing, reading & skills necessary for Kindergarten readiness. The Educational materials will be used alongside gymnastics props/equipment to reinforce the daily lesson plan in a nurturing atmosphere where the children will benefit from the space in the gym to explore & learn. Monthly/weekly themes will be used to enhance art, science, story, song and game activities 😊

Pre-school lead teacher:

Bachelors in early childhood development/elementary education. CPR/1st aid cert.

Gym lead teacher:

29 yrs experience teaching gymnastics with physical and social development background. CPR/1st aid cert.
